AlarmNet

**Phone lines
are vulnerable**

The ultimate protection for your home.

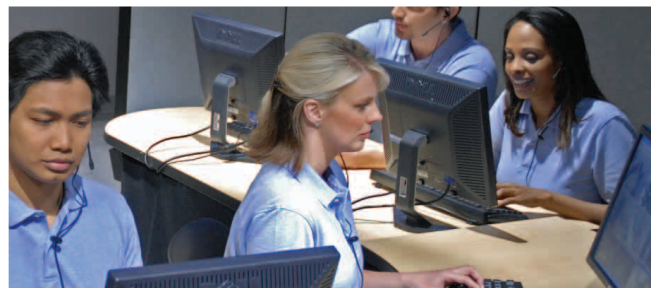

Peace of mind comes from knowing you've made the best choice for the protection of your home and the people who depend on you. Honeywell's AlarmNet service maximizes the effectiveness of your security system by providing your family with an even higher level of protection.

Your electronic security system relies upon the use of your telephone lines to report a burglary, fire or other event.

Communication to your central station is lost if your phone lines are cut by a burglar or are without service due to unforeseen events such as storms. Reliable communication like cellular radio can help ensure that your security system notifies the central station when you need it most – summoning the police, fire or proper emergency response personnel to the protected premise.

The AlarmNet 7845GSM Cellular Radio integrates with your security system to link you to your central station with uninterrupted service. Your signals get through...no matter what. Why trust your security to anything less?
